Professional

Anurag Bhat

Summary

Interdisciplinary professional with expertise in economics, public affairs, and sustainability. Proven track record in policy analysis and climate resilience planning across government, nonprofit, and research sectors.

Experience

Indiana University Bloomington - Research Assistant
Indiana, USA (07/2025 - Present)

- Co-authoring a meta-analysis with Professor David Konisky that investigates disparities in environmental law enforcement under the Clean Water Act and Clean Air Act, synthesizing administrative datasets and published studies to assess patterns in regulatory outcomes across vulnerable communities.
- Leading a comprehensive review of state-level utility disconnection protections for the Energy Justice Lab’s Disconnection Dashboard, analyzing statutory safeguards and regulatory policies to highlight inequities in energy access and inform national advocacy efforts.

Indiana University Bloomington - Graduate Teaching Assistant
Indiana, USA (08/2023 - 05/2025)

- Supported over 400 undergraduate students across five courses by leading office hours, one-on-one tutoring, and integrating evidence-based instructional strategies to enhance comprehension and analytical skills.
- Managed key administrative tasks such as grading, coordinating student projects, and maintaining smooth course operations to support faculty and improve student outcomes.

Gnarly Tree Sustainability Institute - Independent Researcher
Indiana, USA (09/2024 - 01/2025)

- Conducted independent research with the Gnarly Tree Sustainability Institute on the 2019 New Jersey Energy Master Plan, including literature reviews and analysis of datasets from NREL, EIA, DOE, and state sources.
- Collaborated with GTSI’s research team to apply analytical models, calculating LCOE for solar and wind energy and integrating EPA’s Social Cost of Carbon to assess emissions reduction cost-effectiveness.

City of Bloomington - McKinney Climate Fellow
Indiana, USA (05/2024 - 12/2024)

- Spearheaded the HeatWatch initiative in collaboration with NOAA and CAPA Strategies, managing logistics, training 60+ volunteers, and delivering a citywide urban heat map that informed Bloomington’s infrastructure planning and is now featured on the city’s website.
- Designed and executed a citywide community heat survey across 64 neighborhoods; synthesized resident input and spatial data into actionable insights that shaped Bloomington’s Extreme Heat Action Plan.
- Updated and refined Bloomington’s Climate Resilience Plan, integrating recent ordinances and translating technical goals into community-driven, equity-focused strategies.

REA India - Associate - Research | Growth and Marketing

Gurugram, India (02/2023 - 08/2023)

- Conducted survey analysis and policy reviews to produce thought leadership reports with industry insights.
- Built automated dashboards to improve data access and support stakeholder decision-making.

Government of Jammu & Kashmir - Sub Inspector - State Taxes Department

Srinagar, India (11/2021 - 02/2023)

- Managed the comprehensive tax administration life cycle for taxpaying firms in the suburban Srinagar city, encompassing tax audit, returns verification, reimbursements, and compliance of small-scale industries.
- Implemented rigorous enforcement measures, including inspections of products and production units, resulting in enhanced tax regulation adherence and increased revenue collection.

Central University Jammu - Field Investigator

Jammu, India (05/2021 - 09/2021)

- Executed extensive household data sampling and collection initiatives, covering 2400 households in the Indian Himalayan Region of Jammu and Ladakh, as part of the NITI Aayog theme study.
- Utilized collected data and field observations to identify key trends, facilitating the production of detailed field experience reports.

Gokhale Institute of Politics and Economics - Consultant

Pune, India (02/2020 - 07/2020)

- Collaborated on a project by the Indian Council for Social Science Research under the guidance of Dr. Suddhasil Siddhanta, analyzing demographic and socio-economic disparities in social groups using census and National Family Health Survey data.
- Co-authored background research papers and an interim report, contributing to the project's progress through the development and analysis of secondary survey data.

Indian Development Foundation - Research Assistant

Gurugram, India (07/2019 - 12/2019)

- Monitored key performance indicators for 120 pilot projects under UNDP's Disha initiative, analyzing data from field operations and Management Information Systems to develop detailed progress reports.
- Designed and implemented survey instruments and conducted personal interviews and focus group discussions to gather both quantitative and qualitative insights from the field.

Indian Institute of Management - Academic Assistant

Udaipur, India (09/2018 - 06/2019)

- Supported faculty in both teaching and research by leading remedial macroeconomics sessions, designing instructional materials, conducting literature reviews, and performing data analysis and mathematical modeling for academic projects.
- Delivered one-on-one tutoring, created LaTeX-based research outputs, and contributed to coursework development to enhance student learning and faculty research.
